NET WORTH SOLUTIONS CELEBRATES ITS FIFTH ANNIVERSARY IN LAS VEGAS

James Catledge Invites Branch Members from across the Country to Celebrate Five Years of Success

Las Vegas, January 9, 2008 - Net Worth Solutions celebrates its fifth anniversary with a special event, hosted by President and CEO, James Catledge in Las Vegas on January 9. All branch managers from across the country are invited to attend a special training session from Catledge at the Yacht and Beach Club at the Lake Las Vegas Resort to discuss how the company will be moving forward after this important milestone.

The event kicks off on January 8 with an all-day training session for new branch managers to prepare them to run successful and profitable offices across the country and in Canada. Catledge will personally conduct several of these training sessions. That evening, Catledge will host a private dinner for members of the Net Worth Solutions Board of Directors at his home in the exclusive community of Southshore in Lake Las Vegas.

“I know that most businesses fail in the first five years,” said Catledge. “Our company continues to grow and to thrive. Our message to the world becomes more relevant every day. Living debt free, understanding how money works and the right way to build net worth is something that everyone should have the opportunity to learn. My personal mission is to help families around the world know and understand these principles.”

Catledge started Net Worth Solutions after 15 successful years as a financial professional. After realizing that financial companies such as insurance and securities firms educate clients about financial choices in a way that promotes their own personally developed products, Catledge became frustrated by the limitations in his recommendations. By training and building marketing teams that understand what products can best build net worth and increase cash flow, Net Worth Solutions is better able to help create long-term success for families across the country.

About Net Worth Solutions

In 2003, James Catledge launched Net Worth Solutions, a unique grass-roots enterprise dedicated to the mission of building net worth for families. Through countless speaking engagements and events, Catledge has spread his message and shared his unique financial model with thousands of American families, sharing his experience and expertise in real estate investment.
